Paper Review Note Sheet - Castle 14

Paper #: _____

The focus of this review process is twofold: (1) to ensure that all papers are self-studies of merit and are worthy of inclusion in the edited book; and (2) to provide authors with quality, detailed feedback so that they can improve their contribution. Please provide feedback to help authors improve their papers. *This document serves as a guide to review conference papers. The document will not be submitted with the review.*

The context (including reference to relevant literature) provides a clear rationale for the paper. Should include positioning the authors/study in terms of theoretical framework, research literature connection, and physical contexts of the study
The aim, objective or question guiding the paper is relevant to the conference themes. Should include the problem, purpose, and/or questions of the study.
The paper is a self-study self-focused/initiated; improvement aimed; collaborative; exemplar based validation; and answers the so-what question
The methods used in the study in respect to data generation and analysis are outlined. Should include participants, data sources, data analysis, strategies and techniques with attention to issues of trustworthiness.
The outcomes of the study emerge logically from the study aims, the methods used, literature reviewed and evidence generated. Should include findings, discussion, and conclusions.
APA (7th ed.) is used for all in-text citations and references. https://lib.nmu.edu/help/resource-guides/how-guide/apa-style-7th-edition

Notes to Share with Authors:
Context of the Study –   Aim/Objectives –   Self-Study –   Method(s) –   Outcomes –   APA (7th ed.)–   Complete and Accurate Reference List–

*Reminder: The maximum length of the proposal was **4,000 words**, not including the references.
